## Index

The screenshot shows a web browser window with the address bar displaying "Showing results for uploaded file" and "nu.org/nu/#file". The browser's tab bar shows several open tabs, including "index.html - Nu Html Checker" and "Rystron2007/UWatch". The main content area of the browser displays the Nu Html Checker interface. At the top, a blue header reads "Nu Html Checker". Below this, a message states: "This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change". The main heading is "Showing results for uploaded file [index.html](#)". Underneath, the "Checker Input" section contains a "Show" dropdown menu with options for "source", "outline", "image report", and "Options...". Below the dropdown is a "Check by" dropdown menu set to "file upload", a "Choose File" button, and the text "No file chosen". A note states: "Uploaded files with .xhtml or .xht extensions are parsed using the XML parser." A "Check" button is located at the bottom of the input section. A green banner below the input section reads: "Document checking completed. No errors or warnings to show." Below the banner, it says: "Used the HTML parser." and "Total execution time 12 milliseconds." At the bottom of the page, there are links for "About this checker", "Report an issue", and the version number "Version: 21.7.25". The Windows taskbar at the bottom of the screen shows the Start button, a search bar, and several application icons, including Chrome, File Explorer, and the Nu Html Checker application. The system clock in the bottom right corner shows the time as 3:12 PM.
